**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 7-19 are allowed.
2. Applicant's arguments, see pages 6-8 of amendment, filed 5 January 2004, with respect to claims 7-12 have been fully considered and are persuasive. The 35 U.S.C. 103(a) rejection of claims 7-12 has been withdrawn.
3. The following is an examiner's statement of reasons for allowance:

The examiner agrees with the applicant's arguments concerning claims 7-12, specifically that the prior art does not teach the "having stored therein port configuration information representative of said first current port" and "configures said second standby port for data exchange between said first host and said disk devices based on said port configuration". The examiner also feels these arguments apply to the newly added claims, specifically that the art does not teach "said first controller operable to store first port configuration information in said second controller, said first port configuration information representative of said first current port" and "configure said second standby port for reading and writing data between said first host and said disk drives based on said first port configuration".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
